To Whom It May Concern

PROP65 (California Proposition 65) Statement

Proposition 65 became law in November 1986 in California (USA). The official name of Proposition 65 is the Safe Drinking Water and Toxic Enforcement Act of 1986. Proposition 65 enables Californians to know the information of the products that they purchased in their homes or workplaces or that are released into the environment. Proposition 65 requires the product to warn Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm.

Proposition 65 requires the state of California to maintain and update the list of chemicals known to cause cancer or reproductive toxicity. The latest information of the list can be found on the OSHA website: <https://oehha.ca.gov/proposition-65/proposition-65-list>.

Memcon products are applied widely in the electronic industry as a global business-to-business solution, our products when they are used as intended should not intentionally release the Prop 65 chemicals. Memcon will provide the appropriate Proposition 65 warning labels in those cases where Memcon determines the product could take the consumers in California to expose to the chemicals above the safe level as per the Proposition 65 list.

Memcon relies on declarations from our suppliers to determine if Prop 65 chemicals are present in our components and raw materials.

Our products are being used by customers in a variety of applications, customers should evaluate the application and environment in which they intend to utilize Memcon products and determine their obligations under Proposition 65 to their consumers, employees and individuals in California.

Yours sincerely
MEMCON LIMITED
